

DongleSAFE™

Secure Box for USB Devices

Product Code: DS110

The **DongleSAFE™** is a high-security enclosure for any dongle or USB device. When storing important dongles or licenses for your software packages, it is critical that you keep your USB devices protected.

If using iLok USB keys, your devices will be extremely valuable and expensive to replace, so it is even more important that they are kept secure.

The **DongleSAFE™** has a hinged lid fitted with a high-security lock. The enclosure can be bolted to the wall, floor or desk. Lock options available in keyed alike and keyed to differ.

FEATURES & BENEFITS

- High-security enclosure for dongles
- Cost-effective solution for securing USB devices
- Can secure iLok devices to keep your licenses safe
- Hinged lid fitted with seven lever safe lock
- Supplied keyed alike
- Can hold any number of dongles
