

ProHANGER™

Mac
Pro

Secure Under-Desk Hanger for Apple Mac Pro Towers.

Registered Design
No. 4016151

Product Code: PH040

The new **ProHANGER™** has been specifically designed to suspend your Mac Pro under the desk or worktop. The unique design gives the illusion of the Mac Pro being suspended in mid-air, and is ideal for offices and educational training suites where appearance is a must and workspace is at a premium.

A high-security anti-tamper lock is provided to prevent the Mac Pro from being lifted from the support bracket. The mouse, keyboard, FireWire, headphone and power cables can be secured in the locking mechanism underneath the desk or worktop, and once fitted acts an ideal cable tidy.

Constructed of 3mm hardened steel, the **ProHANGER™** is easy to install and comes with a fixing template that can be taped to the underside of the worktop prior to drilling. An optional heavy-duty security cable can be added at the rear of the unit to secure the LED Cinema Display.

Features & Benefits

- Unobtrusive under-desk hanger
- Securely fixes to underside of desk or worktop
- Features high security anti tamper lock – keyed alike
